SISED I MONEY MARKET FUND

Fund Fact Sheet as at 31 March 2025

INVESTMENT OBJECTIVE

The Fund aims to earn a higher-level income than bank deposits and money on call while aiming for capital preservation and liquidity. The main objective is stability with the aim for capital preservation. The Fund is Regulation 13 compliant with at least 45% invested in Namibian securities.

INVESTMENT POLICY

The underlying securities of the Fund will consist of assets including negotiable certificates of deposit (“NCDs”), treasury bills, debentures, notes and other instruments of a fixed income nature having an average duration of six months.

WHO SHOULD INVEST

The Fund is suitable for investors with a short to medium term investment horizon with a low risk appetite.

FUND COMMENTARY

Amid ongoing global trade tensions and increased volatility, persistently high global inflation may delay the pace of further interest rate cuts. Additionally, initiatives by the U.S. Department of Government Efficiency (DOGE), along with ongoing trade negotiations, present a mixed outlook with the potential for both inflationary and deflationary outcomes. In this environment, we maintain a cautious stance on monetary easing, focusing on opportunities to lock in attractive yields while actively managing duration to navigate the evolving landscape.

The Floating Rate Note remains the Fund’s top-performing asset, continuing to offer an attractive spread over JIBAR. South African Treasury Bills have also contributed positively, maintaining a premium over their Namibian counterparts and enhancing the Fund’s year-to-date performance. Elevated bank liquidity in Namibia has kept bank deposit rates below the yields on Namibian Treasury Bills, reinforcing our strategy of holding these instruments as core positions. As a result, the Fund is currently delivering an effective annual yield of 7.9% (after fees) to Retail Clients, well above the latest Namibian annual inflation rate (NCPI March) of 4.2%, ensuring real, inflation-beating growth for investors.

KEY HOLDINGS

Collective Investment Schemes (unit trusts) are generally invested over a medium to long-term period. The value of participatory interests (units) may fluctuate, and past performance is not necessarily a guide to predict future performance. Unit Trust prices are calculated on a net asset value basis, which is the total capital value invested including any income accrual and less permissible deductions from the portfolio divided by the number of units in issue. Income accruals are made daily and paid out monthly. The following permissible charges are levied against the portfolio: Brokerage, auditor’s fees, bank charges, trustee fees and all other related fees. Upon request, a schedule of the applicable fees and charges can be made available by the management company. Commission and incentives may be paid and if so, would be included in the overall costs.

The Sisedi Money Market Fund is administered by Boutique Collective Investment Namibia (“BCIN”) Ltd (2020/0330), a NAMFISA registered (25/9/5/3) Unit Trust Management Company.
